Rich, lithium and methane messages are finalized. They are shorter as they were rewritten by Betsaida to be more like Qs/As. But we also have other bullets that we can use with citizens that did not require HQ approval. But your right let's talk in the morning. Thanks, den.

**Subject:** Messaging bullets

Den,

One question I still have that we can discuss tomorrow is whether the lithium and methane messaging bullets have been finalized. I think we will need them before we re-schedule. I know that we haven't finalized sodium and barium, from our call today. Just didn't want to miss any final documents on lithium and methane.

let's talk tomorrow.

Rich

p.s. still plan to call Ms. Myrick tonight....will let you know if there are issues. Otherwise, we will talk tomorrow.
